1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16 , drawn to an interposer, classified in class 324, subclass 755.
  - II. Claims 17-27, drawn to a system for testing a semiconductor device, classified in class 324, subclass 765
  - III. Claims 28-29, drawn to a method for manufacturing an interposer, classified in class 29, subclass 832.
  - IV. Claims 30-38 , drawn to a method for testing a semiconductor device, classified in class 324, subclass 765.
2. The inventions are distinct, each from the other because:
3. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of group I can be made by different process other than the process of group III.
4. Inventions II and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product in group II can be practiced by different process other than the process of group IV .

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I, III and IV, restriction for examination purposes as indicated is proper.

7. If group I is elected, a further election species is required as follows:

8. This application contains claims directed to the following patentably distinct species of the claimed invention:

A) species of figure 6,

B) species of figure 7 and

C) species of figure 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. If group II is elected, a further election species is required as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

AA) species of figure 1 and

BB) species of figure 9.

10. If group IV is elected, a further election species is required as follows:
11. This application contains claims directed to the following patentably distinct species of the claimed invention:

AAA) species in which claims 30 is drawn to,

BBB) species in which claim 31 is drawn to and

CCC) species in which claims 32-38 are drawn to.

12. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

13. A telephone call was made to Mr. DeSandro on Jan. 6, 2000 to request an oral election to the above restriction requirement, but did not result in an election being made.
